Very Basic Text

By W. Thio

This is adequate for a medical student on an anesthesiology rotation. Not for residency. I bought this in 2009 when there were fewer resources available on e-readers. I read a few chapters when I was on call but found much better materials over the next few years as many more textbooks came online.

satisfactory source for studying

By Moustafa Mortada

just enough for the FRCA part one and european diploma for anesthesia ... perfect illustrations and to the point .
