What a great book! I would call this the trading situational ...

By Don't fall for this

What a great book! I would call this the situational awareness trading manual. It's really a great format with questions I would have asked myself. They are such that every level of trader can benefit. The multiple answer format allows you to see the thought and individual "art" that's behind every great trader. Momentum Masters cuts out the clutter - really holding these guys accountable to the advice given. After all - they have each other to answer to in addition to the reading audience. Every trader at all levels should take a couple of reads though Momentum Masters (I am at one but will pick it back up and read though it again)! Well done guys. The icing on the cake is that you can see them live together - asking any question you want. And they stay until every question is answered.

I know to some this will sound like a commercial. But I am a real trader that considers myself a "nugget hunter" for continuous improvement. I also want to point out the real - all too many aren't. These guys are real.....

Sitting at the Feet of the Masters

By @2themoon

There are two types of traders that will read this book, profitable traders and unprofitable traders - and it has something for both.

If you're already profitable, you'll instantly realize the experience of these four gentlemen, and you're bound to find something which may refine your methods even further and help you turn out a few triple digit years.

If you're unprofitable, then maybe the insights they share will take you over the hump.

(If you're new to trading, start elsewhere and come back later because this definitely isn't an introductory course on trading even though it does cover everything).

With that said, here is your opportunity to sit front row during a fantastic interview while four professionals with decades of collective experience talk about what works when trading growth stocks.

Like the four Gospels in the New Testament, you get four individual's unique perspectives on the same subject, each helping to clarify the picture in their own unique way. At the end you realize they're saying the same thing.

If this book has a central message, it could be summed up by the following: Search for companies which are growing their earnings at a high rate, be highly selective about the stocks you trade and the entries you take, keep your losses small, make sure your winners are multiples larger than your losses, and turn your capital over as rapidly as possible. That is the essence of trading.

To get the details you have to read the book. And there are a lot of details. They couldn't have been more transparent about their methodology.

Read it, study it, go trade, read again, go trade, read again, go trade. Eventually you should get the hang of it - but as each of their experience shows, it takes a lot of hard work and discipline.

Thanks Mark, David, Dan, and Mark - this is an incredible contribution to the trading community that will likely stand the test of time. Five stars.
