This book was originally published prior to 1923, and represents a reproduction of an important historical work, maintaining the same format as the original work. While some publishers have opted to apply OCR (optical character recognition) technology to the process, we believe this leads to sub-optimal results (frequent typographical errors, strange characters and confusing formatting) and does not adequately preserve the historical character of the original artifact. We believe this work is culturally important in its original archival form. While we strive to adequately clean and digitally enhance the original work, there are occasionally instances where imperfections such as blurred or missing pages, poor pictures or errant marks may have been introduced due to either the quality of the original work or the scanning process itself. Despite these occasional imperfections, we have brought it back into print as part of our ongoing global book preservation commitment, providing customers with access to the best possible historical reprints. We appreciate your understanding of these occasional imperfections, and sincerely hope you enjoy seeing the book in a format as close as possible to that intended by the original publisher.

Moral Judgement

By Nicholas Roberts

Piaget did an excellent job in this book describing how children make moral decisions. He provides tons of supporting information that makes the readers really think about the way that children develop. The book starts out by him talking about games that children play in Switzerland at that time period. He goes over the different rules and regulations of the games which he says explain how children think about things such as fairness. For example, today, kids in tag may not let the younger children get tagged as easily showing that they have compassion for their younger comrades as well as try to even the playing field.

Piaget then goes into different topics and describes why children of that age think the way that they do. He

uses simple examples such as if a child broke 50 glasses by accident and another broke one on purpose who is more "evil"? Younger children tend to pick the former and older, the latter. He follows this trend throughout the whole book and covers such things as fate (if a child falls through a bridge did he do so because he was being punished?). Overall the book is very interesting and readable. If you are interested in child psychology I highly recommend it.
